N	No-See-Um (dt. Gnitzen)	<p>No-see-ums: this speaks 'noZiehEmms' and is the expression for a special kind of micro-small sand fly. However, this has nothing to do with sand, as they can occur anywhere in warm and humid climates. We have mixed together a tried-and-tested home remedy. You can find it in the upper cupboard of the Laundry. If you want to mix yourself: 1/2 Listerine Original 1/2 Witch Hazel and a few drops of tea tree oil</p> <p>They are called this way, because you can hardly 'see' them. The little guys bite and you have mini-small swollen spots, mostly on the leg, that itch for days - many describe this as stronger itching than with Mosquito stiches, especially longer lasting.</p>
